RE: 10 Mile Road Landfill Site

Dear Len:

I was informed about 2:00 p.m. on June 14 that the plastic liner had been installed in the morning. They had earlier notified us of intent to install it last Friday, but the liner did not arrive.

George Pio and I went immediately out to the site and checked to see that it had been installed according to specifications. We determined that it had been tied in on the sides properly.

They have also dug the furrow preparatory to putting a liner in the leachate collection pond. Apparently, that liner material has not yet arrived.

The general appearance of the site is excellent, and traffic is moving rapidly into the site, as indicated by the number of trucks that we observed during the short time that we were there.

The Sparta Landfill is completely closed, and they are now in the process of contracting with a private contracting firm to place the two foot of cover on the entire landfill area and to seed it with rye.

Sincerely,

W.L. Ettesvold, R.S.  
Director of Environmental Health
